ABSTRACT

Stickybear's Math Splash is a CD-ROM-based software tool for teaching mathematics skills beyond simple number recognition to elementary students. The accompanying printed lesson plans are designed to complement mathematics skills with other methods and areas of emphasis including kinesthetic learning, listening skills, decision making skills, and other vital tools for educational development. Each of the 12 lesson plans includes activities, area focus, description of the method used, goals and objectives, materials required, and the area of emphasis and several variations. (ASK)
